## NPS Recognized for Planning Excellence

American Planning Association honors collaboration & innovation

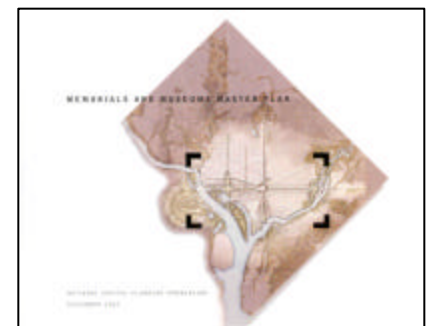

The National Park Service received several awards this year from the American Planning Association for projects demonstrating leadership in collaborative and innovative planning. The planning projects were honored at the national conference of the American Planning Association Federal Planning Division held April 11-12, 2002 in Chicago, where the National Park Service received four of the ten awards given to federal projects. Thank you to our winners for helping establish NPS as a leader in planning.

A 70 member interdisciplinary team from the public and private sector worked together to produce the report in two years, truly a successful collaborative effort.

### **Dry Tortugas National Park General Management Plan Amendment**

Southeast Region & Denver Service Center

The Southeast Region and the Denver Service Center won in the category of Outstanding Collaborative Planning Project for the "Dry Tortugas National Park General Management Plan Amendment." The plan was recognized for its emphasis on consensus building and for offering imaginative ways to balance preservation and revenue objectives.

### **Memorials and Museums Master Plan: Washington, D.C.**

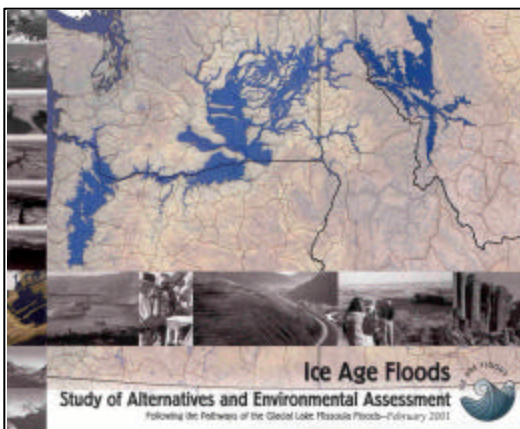

National Capital Planning Commission & the Joint Task Force on Memorials, National Capital Region

The National Capital Planning Commission and the Joint task Force on Memorials, of which the National Capital Region is a principal member, were co-winners for "Memorials and Museums Master Plan: Washington, D.C." The plan was recognized for its forward thinking and for offering a comprehensive rethinking of some of the most important symbolic and enduring features of the capital landscape.

### **Green Marina Program**

National Capital Region

The National Capital Region's "Green Marina Program" was also honored as an Outstanding Federal Planning Program. The program provides a comprehensive approach and practical steps for reducing the environmental impacts of marinas.

### **Ice Age Floods Study of Alternatives**

Pacific West Region

The Pacific West Region was a co-winner in the category of Outstanding Non-Military Federal Planning Project for "Ice Age Floods Study of Alternatives." The study was cited for balancing tourism, scientific education, and sustainability objectives and for its public participation process across four states.
